To: Wan Ryan Asri &lt;wanryanryan@gmail.com&gt;

Wan Ryan Asri:

Thank you for submitting the manuscript, "Effect of Al Concentration over ZnO-Al<sub>2</sub>O<sub>3</sub> Physicochemical Characteristics and Photocatalytic Degradation of Remazol Red RB" to ASEAN Journal of Chemical Engineering. With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Manuscript URL: <https://jurnal.ugm.ac.id/AJChE/author/submission/70084>

Username: wanryanasri

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work.

Lisendra Marbelia, S.T., M.Sc., Ph.D.

Wan Ryan Asri:

Thank you submitting your manuscript to our journal.

Based on our reviewer comments, we have reached a decision regarding your submission to ASEAN Journal of Chemical Engineering, "Effect of Al Concentration over ZnO-Al<sub>2</sub>O<sub>3</sub> Physicochemical Characteristics and Photocatalytic Degradation of Remazol Red RB" which is to resubmit for review.

Please see below the comments from the reviewer. Revise it accordingly, and summarize the revision in the form (attached). Please kindly send the revised manuscript and the form within 3 weeks.

We are looking forward to receiving your manuscript.

Thank you.

Dr. Lisendra Marbelia

Editor:

Some improvements are needed:

- English have to be improved.
- Quality of Figure have to be improved. (Some are very low quality, font are too small).
- More recent references related to the topic need to be added to the introductions.

Reviewer A:

The manuscript seems to offer interesting study related to ZnO-Al<sub>2</sub>O<sub>3</sub>. However, the grammatical errors found throughout the manuscript are quite severe that the manuscript is incomprehensible. The authors need to rewrite the manuscript to improve the qualities and the Figures should be drawn properly to appease the readers. Some of the comments can be found below:

The abstract can be started with importance of performing this study, since from the title the readers can grasp the goal of this study.

The XRD and elements analysis written in abstract is oddly explained. Are these values contributing to the performance of material? If not, they can be omitted.

The novelty of the study needs to be highlighted in Introduction. What differentiate this study from previous ones?

Characterization of materials should include the name, series, and producer of instrument.

The methodology mentioned that the material is xerogel. Therefore, imaging result should confirm the formation of xerogel.

The removal of dye is shown in several figures that show "effectiveness" instead of removal or degradation performance. The term is not appropriately used.

Dear Prof/Dr. Wan Ryan Asri,

We are pleased to inform you that your recent submission titled "Effect of Al Concentration over ZnO-Al<sub>2</sub>O<sub>3</sub> Physicochemical Characteristics and Removal of Remazol Red RB" has been accepted for publication in ASEAN Journal of Chemical Engineering.

Please complete the copyright transfer form as attached and send the filled form to [ajche.ft@ugm.ac.id](mailto:ajche.ft@ugm.ac.id) as soon as possible.

You are also requested to pay publication fee  
Amount: Rp. 1500.000. Our administrative staff will contact you shortly regarding payment procedure. Once you make payment, please confirm and send payment notice via: [renny.puspita@ugm.ac.id](mailto:renny.puspita@ugm.ac.id) and cc to [ajche.ft@ugm.ac.id](mailto:ajche.ft@ugm.ac.id)

For publication process, we will contact you again when your proof is ready for you to check before its publication.

Thank you for your interest in ASEAN Journal of Chemical Engineering. We look forward to publishing your future article.

Editor,

Dr. Lisendra Marbelia
