Mohammad Zulkarnain (Author):

We have reached a decision regarding your submission to Open Access Macedonian Journal of Medical Sciences, "The effect of stunting on tooth eruption of primary school children at Tuah Negeri Sub-district, Musi Rawas District, South Sumatera Province, Indonesia", Manuscript ID = OJS8316.

Our decision is: Revisions Required

Sincerely,  
Prof. Dr Mirko Spiroski,  
Editor-in-Chief, OAMJMS

Sasho Stoleski

Reviewer A:

I have not found a statement of ethical approval and a collection of informed consent. English needs to be improved before further review!

Recommendation: Resubmit for Review

---

Reviewer B:

In General: it's a good paper and the subject of the manuscript is applicable and useful.

**Title:** the title can modify again because it is not experimental research

**Abstract:** abstract contains an appropriate summary for the article, language used in the abstract easy to read and understand, there are no suggestions for improvement.

**Introduction:** authors do provide adequate background on the topic and reason for this article and describe what the authors hoped to achieve.

**Results:** the results presented clearly, the authors provide accurate research results, there is sufficient evidence for each result.

**Conclusion:** in general: Good and the research provides sample data for the authors to make their conclusion.

Recommendation: Revisions Required

---

Reviewer E:

Abstract is too long. The method is very short, lacking in detail and I did not find the Ethical Approval along with the number.

Recommendation: Decline Submission
