Editor Subject: [IJECE] Editor Decision: "Demand Robust Counterpart Open Capacitated [DELETE](#)
2020-02-25 Vehicle Routing Problem Time Windows and Deadline (DRC-OCVRPtw,d) Model of Garbage
05:06 PM Transportation in Sukarami Sub-District, Palembang with LINGO 13.0"

The following message is being delivered on behalf of International Journal of Electrical and Computer Engineering (IJECE).

Dear Prof/Dr/Mr/Mrs: Fitri Maya Puspita,

We have reached a decision regarding your submission entitled "Demand Robust Counterpart Open Capacitated Vehicle Routing Problem Time Windows and Deadline (DRC-OCVRPtw,d) Model of Garbage Transportation in Sukarami Sub-District, Palembang with LINGO 13.0" to International Journal of Electrical and Computer Engineering (IJECE), a Scopus indexed journal, SJR Q2 on Electrical & Electronics Engineering and SJR Q2 on Computer Science.

Our decision is: Revisions Required

The goal of your revised paper is to describe novel technical results.

A high quality paper MUST has:

- (1) a clear statement of the problem the paper is addressing --> explain in "Introduction" section
- (2) the proposed solution(s)/method(s)/approach(es)/framework(s)/algorithm(s)
- (3) results achieved. It describes clearly what has been done before on the problem, and what is new.

Please prepare your revised paper within 8 weeks. Read the checklist for preparing your revised paper for publication at: <http://ijece.iaescore.com/index.php/IJECE/about/editorialPolicies#custom-3>. Please try to follow the format as closely as possible.

Please submit your revised paper in MS Word file format (or compressed file of your LATEX source files if you presented your paper in LATEX) and submit it through our online system at same ID number (DO NOT as new submission) or simple by reply this email. Then your revised paper will be judged on originality, significance, interest, clarity, relevance, correctness, and presentation; either accepted or rejected.

I look forward for hearing from you

Thank you

Best Regards,
T. Sutikno
Managing Editor, IJECE

::: IMPORTANT :::

There are four (4) types of technical results:

1. A theory: consisting of a collection of theorems.
2. An algorithm/method/approach/framework/ ;
3. A system construct: such as hardware design, software system, protocol, etc.; The main goal of your revised paper is to ensure that the next person who designs a system like yours doesn't make the same mistakes and takes advantage of some of your best solutions. So make sure that the hard problems (and their solutions) are discussed and the non-obvious mistakes (and how to avoid them) are discussed.
4. A performance evaluation: obtained through analyses, simulation or measurements;

In preparing your revised paper, you should pay attention to:

1. Please ensure that: all references have been cited in your text; Each citation should be written in the order of appearance in the text; The references must be presented in numbering and CITATION ORDER is SEQUENTIAL [1], [2], [3], [4],

Please download & study our high-impact papers for your references:

- <http://ijeecs.iaescore.com>
- <http://ijece.iaescore.com>
- <http://beei.org>
- <http://journal.portalgaruda.org/index.php/eecsi>

(Please use "Search" menu under "JOURNAL CONTENT" menu in right side of the site)

2 An Introduction should contain the following three (3) parts:

- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about.
- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.
- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are used in this section.

3. Results and discussion section: The presentation of results should be simple and straightforward in style. You should improve your analyzing and also present the comparison between performance of your approach and other researches. Results given in figures should not be repeated in tables. This section report the most important findings, including results of statistical analyses as appropriate. It is very important to prove that your manuscript has a significant value and not trivial.

 ::: UPDATE YOUR METADATA in our online system :::

Update your metadata in our online system when you submit your revised paper through our online system:

- Authors name are presented without salutation
- Authors Name are presented Title Case (ex: Michael Lankan, NOT --> michael lankan, NOT --> MICHAEL LANKAN). Add all authors of your paper as per your revised paper
- Title of revised paper (ex: Application of Space Vector , NOT --> APPLICATION OF SPACE VECTOR
- Content of updated abstract

This journal is an OPEN ACCESS. Why publish open access? IAES open access authors benefit from: Quality, established and reputable journal, reaching key audiences' with 5 million users per month, high citations, etc. Benefits of the OPEN ACCESS policy:
- Researchers as authors: immediate visibility for research output and thus increased visibility and usage of their results. Open Access may even lead to an increase of impact.
- Researchers looking for information: access to literature everywhere, not only from a campus but also from any site with Wifi access.
- Funding agencies: increased return on investment (ROI), increased visibility.
- Universities & research institutes: greater visibility, clearer management information.
- Libraries: increased access for target audience, financially a more attractive model than the current subscription model.
- Teachers & students: unrestricted access to material, enriched education, allowing equality of learning in poor as well as in rich nations.
- Science: enhanced and accelerated research cycle.
- Citizens & society: access to knowledge/access to the results of publicly funded research.
- Enterprises: access to critical information.
- Publishers: transparent business model, ultimate online article distribution, ultimate visibility for articles.
