Reviewer D:
Accepted with minor correction
Comments:
Detail Comments (please advise the authors on how to improve their paper)

1. Please use term "social media application" instead of brand/patent name of application
2. Please use consistent term of group name, i.e. Intervention and control group or other name
3. Explain the detail of gadget wearing during study: how long in a day, do they use it during bath or sleep. How the author judge equality of foot steps measurements on intervention and control group
4. Provide exact p value instead of $p < 0.05$.
5. Provide mean different and p value at 7 days between intervention vs control group
6. Provide mean different and p value of 7 days vs 3 months of control group and also intervention group for all study variable. It's better put its on separate table or use narration on the results section
7. The title of references in non-English language should be translated to English, and put it in the bracket after original title

Recommendation: Revisions Required

Reviewer E:
The manuscript could accept with minor revision. the research is explained sistematically and cleared
Recommendation: Accept Submission
