Good morning Prof,

Thank you for your email and reminder. Sorry for the late reply. I do not change the word matheuristic. Because actually the right one is matheuristic not metaheuristic.

Matheuristics is a hybrid technique that combines the exact and approximate methods to solve mathematical problems of interest using their exploitation features. These techniques use improved mathematics programming techniques based on metaheuristics and vice versa-

So, which word should I use? matheuristics or metaheuristic?

Thank you
