Judul: [ICEAT] Editor Decision

Dear Dr. Irmeilyana:

We have reached a decision regarding your submission to International Conference on Engineering and Applied Technology (ICEAT), "A Profile Analysis of Blacksmith in Desa Limbang Jaya I Kecamatan Tanjung Batu Kabupaten Ogan Ilir".

in Desa Limbang Jaya I Kecamatan Tanjung Batu Kabupaten Ogan Ilir".

Our decision is to: ACCEPT with minor revisions

You should improve your analyzing and also present the comparison between performance of your approach and other researches. The "result and discussion" section reports the most important findings, including analysing results as appropriate. It is very important to prove that your manuscript has a significant value and not trivial.

In preparing your revised paper, you should also pay attention to:

1. Introduction section: explain the context of the study and state the precise objective
An Introduction should contain the following three parts:
 - Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about.
 - The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.
 - The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work.Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are used in this section.
2. Conclusion section: Summarize sentences the primary outcomes of the study in a paragraph.

You should prepare your revised paper carefully and strictly consider the guide of authors (<http://conferenceseries.iop.org/content/authors>), and submit your revised paper through our online system within 12 days.

We look forward for your revised paper

Thank you,

Sincerely yours,
Tole Sutikno
