TELKOMNIKA Telecommunication, Computing, Electronics and Control is a Scopus indexed leading journal, Scimago journal ranking (SJR) Q2 on Electrical & Electronics Engineering. This journal ONLY publishes high quality papers. A high quality paper MUST has: 1) a clear statement of the problem the paper is addressing; 2) the proposed solution(s); and 3) results achieved. It describes clearly what has been done before on the problem, and what is NEW. The goal of your final camera ready paper is to describe NOVEL TECHNICAL RESULTS.

Update title of your paper! The title summarizes the main idea or ideas of your study (title is 'summary' and 'essence' of your paper). Title should be 'encompassing' as well as 'descriptive'. A good title contains the fewest possible words needed to adequately describe the content and/or purpose of your research paper. Rarely use abbreviations or acronyms unless they are commonly known. Find the below guide, how to update your paper title.

For original research paper, there are four (4) types of novel technical results: 1) An algorithm; 2) A system construct such as hardware design, software system, protocol, etc.; The main goal of your revised paper is to ensure that the next person who designs a system like yours doesn't make the same mistakes and takes advantage of some of your best solutions. So make sure that the hard problems (and their solutions) are discussed and the non-obvious mistakes (and how to avoid them) are discussed. 3) A performance evaluation: obtained through analyses, simulation or measurements; or 4) A theory: consisting of a collection of theorems. Your final camera ready paper should focus on: 1) Describing the results in sufficient details to establish their validity; 2) Identifying the novel aspects of the results; i.e., what new knowledge is reported and what makes it non-obvious; and 3) Identifying the significance of the results, what improvements and impact do they suggest. Number of minimum references for original research paper is 25 references (and minimum 20 recently journal articles).

Identifying the significance of the results, what improvements and impact do they suggest. Number of minimum references for original research paper is 25 references (and minimum 20 recently journal articles).

For review paper, the paper should present a critical, constructive analysis of the literature in a specific field through summary, classification, analysis and comparison. The function and goal of the review paper is: 1) to organize literature; 2) to evaluate literature; 3) to identify patterns and trends in the literature; 4) to synthesize literature; or 5) to identify research gaps and recommend new research areas. The structure includes:  
1. Title – in this case does not indicate that it is a review article  
2. Abstract – includes a description of subjects covered  
3. Introduction includes a description of context (paragraph 1 – 3), motivation for review (paragraph 4, sentence 1) and defines the focus (paragraph 4, sentences 2 – 3)  
4. Body – structured by headings and subheadings  
5. Conclusion – states the implications of the findings and identifies possible new research fields  
6. References ("Literature Review") – organised by number in the order they were cited in the text.  
Number of minimum references for review paper is 50 references (and minimum 40 recently journal articles).

Prepare your abstract in single paragraph and within 200 words. You need to summarize your contribution, idea, findings/results, and describe implications of the findings. Without abbreviations, footnotes, or references. Without mathematical equations, diagram or tabular material. It is suggested to present your abstract included the elements: 1) state the primary objective of the paper; 2) highlight the merits (or contribution); 3) give a conceptual idea on the method; 4) describe the research design and procedures/processes employed (is it simulation, experimental, survey etc.); 5) give the main outcomes or results, and the conclusions that might be drawn; and 6) include any implications for further research or application/practice, if any.  
Please refer to <https://bit.ly/35R6JTs> and <https://bit.ly/2Dxl9Ml> for further guidelines

Your final camera ready paper should reflect a careful consideration of the following criteria:

1. Analysis: your revised paper should demonstrate a clear understanding of the key issues related to your topic of choice. The paper should display analysis and not mere summary of the topic under consideration. It should also include evidence to support arguments where necessary.
2. Connections: your paper should demonstrate a connection of the references you mention to the central topic and to each other where necessary throughout the paper.
3. Mechanics: this includes attention to punctuation, grammatical soundness and your submissions being checked for spellings errors.
4. Formatting: adhere the new guide of authors (<http://icw.telkomnika.com/download/telkomnika-template-and-guide-of-authors-2020/>)

Guideline for preparing your paper title

A good research paper title: (1) Condenses the paper's content in a few words & Use words that create a positive impression and stimulate reader interest; (2) Captures the readers' attention; (3) Indicate accurately the subject and scope of the study and Differentiates the paper from other papers of the same subject area. Five (5) Simple steps to write a good research paper title.

STEP 1. Ask yourself these questions and make note of the answers:  
 - What is my paper about?  
 - What techniques/ designs were used?  
 - Who/what is studied?  
 - What were the results?  
 STEP 2. Use your answers to list key words  
 STEP 3. Create a sentence that includes the key words you listed  
 STEP 4. Delete all unnecessary/ repetitive words and link the remaining.  
 STEP 5. Delete non-essential information and reword the title.

General Guidelines:

1. Please re-read our instructions (at <http://journal.uad.ac.id/index.php/TELKOMNIKA/about/editorialPolicies#custom-1>) carefully and follow the checklist strictly, as any spelling mistakes and errors may be translated into the typeset version.  
 2. The "result and discussion" section reports the most important findings, including analysing results as appropriate. It is very important to prove that your manuscript has a significant value and not trivial.  
 3. Please re-check that all references are already cited in your article, and order of your citation is SEQUENTIAL.  
 example in a paper:  
 → [1-4], [2], [5-6], [7-9], [8], [4-5], [9], [10-14], [12], [15] .....  
 (SEQUENTIAL) — correct  
 → [1], [2], [3], [4-6], [7], [8-10], [4-5], [11-16], [13], [17] .....  
 (SEQUENTIAL) — correct  
 → [2], [3], [6], [1], [4-5], [7], [11-16], [8-10], [13], [17] ..... (NOT SEQUENTIAL) — INCORRECT  
 → [4-5], [7], [2], [3], [17], [6], [1], [11-16], [8-10], [13] ..... (NOT SEQUENTIAL) — INCORRECT

4. If you need references to enrich your references and improve your paper, please get take a look at:
