Dear Editor in Chief

Journal of Biological Researches Berkala Penelitian Hayati,

We submit article entitle "POTENCY OF ENDOPHYTIC FUNGI FROM *Nauclea orientalis* L. AS ANTIOXIDANT PRODUCER" for publish in Journal of Biological Researches Berkala Penelitian Hayati. All author agree to publish in this journal and equally contribute to this study. This paper not recognized for publication in another journal and submit for Journal of Biological Researches Berkala Penelitian Hayati only. We hope you accepted our article for publish in Journal of Biological Researches Berkala Penelitian Hayati because this study explored about endophytic fungi as antioxidant producer from *Nauclea orientalis* L. The antioxidant ability of endophytics fungi because of their secondary metabolite compounds. We found that six endophytic fungi from *N. orientalis* root, leaves and stem contain tannin, terpenoid, alkaloid and flavonoid compounds. Three endophytic fungal isolates have the ability to produce very strong antioxidant compounds and identified as *Aspergillus* section *Flavi*, *Diaporthe* sp. and *Acremonium* sp..

We believe that this manuscript is appropriate for publication by Journal of Biological Researches Berkala Penelitian Hayati. because this research explored fungi from one of Indonesian's biological resources that produce natural product related to the field of pharmacy. This research reveals Indonesia's biodiversity which has the potential to be developed in the future.

We have no conflicts of interest to disclose.

We confirm that this work is original and has not been published elsewhere, nor is it currently under consideration for publication elsewhere

Thank you for your consideration of this manuscript

Thank you,

Hary Widjajanti

Major revision with reevaluation-BKJT224

From: Journal of Biological Researches (berkalahayati@yahoo.com)

To: haryunsri@yahoo.com

Cc: harywidjajanti@gmail.com

Date: Tuesday, July 27, 2021 at 07:05 AM GMT+7

Dear Author (BKJT224),

Elisa Nurnawati; Hary Widjajanti; Vivi Hendra Sutandar; Maulida Harwati; Eka Amelia; Siti Alharzsa; Nina Tanzerina;

Thank you for considering Berkala Penelitian Hayati for your manuscript submission. Your manuscript has been reviewed by the experts in the fields. After carefully examining your manuscript and the comments, I am afraid that the manuscript cannot be accepted for publication in its present form without "Major Revision with reconsideration and reevaluation". If you feel like to revise the paper to suitably address the reviewer's comments, please do so and resubmit it along with point-by-point responses to all the comments.

I hope the reviewer's comments are of help to you if you choose to revise the manuscript. Please accept my thanks for the opportunity to consider your contribution for Berkala Penelitian Hayati. On the basis of reviewer comments, please revise the manuscript considering all suggestions carefully, and either change the manuscript appropriately or provide convincing reason for declining to do so.

For your resubmission, please include:

1. A detailed, point-by-point list of your replies to the comments of reviewer. For each reviewer comment, make a clear connection to your response, so as to facilitate simultaneous consideration of the reviewer's comments and your replies to those comments. That response document needs to include:
 - A. Exact comment from the reviewer in black italic type.
 - B. Indent an in normal font used blue color, your response to that comment, either what and why you have made the change or a clear justification of why you have chosen not to make a change.

2. Revised manuscript with tracked change

3. Revised manuscript without tracked change

Remember to include changes to your text. If the reviewer had a question, it is likely that a reader may have the same question. It is not sufficient to respond only to the editor, but rather you need to revise your paper to clarify the point in question. If you have problem with proofreading the text by English Native Speaker, let us know.

The revised manuscript should be resubmitted due to August 27th, 2021

Sincerely,
Prof Sutiman Bambang Sumitro

Date: Thursday, August 26, 2021 at 10:43 AM GMT+7

Dear Editors,

Thank you for reminding us to revise our article. According to the reviewer's suggestion regarding inaccurate identification, we tried to identify the fungi in more detail using molecular data . Until now, the data is still being analyzed. Therefore, we request that the deadline for submitting article revisions be extended until Monday, August 30, 2021.

We thank you for your approval.

Best regards,
Hary Widjajanti

Manuscript Number: BKJT-224

Potency of endophytic fungi from *Nauclea orientalis* L. As antioxidant producer

Dear Authors,

Thank you for addressing the reviewer comments on your manuscript. I am pleased to confirm that your paper "**Potency of endophytic fungi from *Nauclea orientalis* L. As antioxidant producer**" has been accepted for publication in Berkala Penelitian Hayati Volume 27, Number 1 (December 2021). Accordingly, Could you please carefully check the composed version for any potential errors and suggest any corrections that need to be incorporated before its publication?

During finalization it has been observed that few editorial requirements are missing in the composed version. You are therefore requested to kindly fulfil those requirements so that your article could be proceeded for publication. Please mark every changes you make by blue color

In addition, the payment for further publication process is requested.

Details for Payment:

Journal Administration = IDR 1,400,000

Recipient Name: PERKUMPULAN BIOLOGI JAWA TIMUR

Account number: 144-00-2021242-6, Mandiri KCP Malang Universitas Brawijaya

After checking and completing the payment, please kindly send the proof of payment together with your final revised manuscript. Simultaneously, **PLEASE resubmit your final revision in our system**, [Submissions](#) | [Berkala Penelitian Hayati](#)

Submissions | Berkala Penelitian Hayati

We glad to receive the final version of revised manuscript due to October 29th, 2021.
