The screenshot shows a Gmail interface with a search bar containing 'briac'. The email is from 'Alex Grumezescu <al.grumezescu@gmail.com>' dated 'Min, 21 Nov 2021, 20:00'. The subject is 'BRIAC_Vol_12_Iss_5_Your paper has been published online'. The body text reads: 'Sorry for this unforeseen delay. Dear Author, Many thanks for your contribution to our journal in Volume 12, Issue 5, 2022. It was a pleasure to publish your work free of charge. Here you will find the paper: https://biointerfaceresearch.com/?page_id=9001. DOI will be assigned soon. This year, the journal was not qualified to receive the first impact factor for missing ~100 citations. This year, even if we missed the impact factor, the journal is listed as a Q3 Journal in Journal Citation Indicator (JCI - Clarivate Analytics). It is noted that BRIAC belongs to the category Chemistry, Applied - ESCI. In this category, there are 74 journals. In order to receive the first impact factor in the Q1-Q2 zone (top 50%). This year, the end of the Q2 zone was at an impact factor of 2.346. Our unofficial impact factor was 1.97, calculated based on 258 publications and a simple calculus, to rise above 2.346, we should have had 95 more citations at least, but we did not have them. This is life; I will continue my work even if the results are not usually as desired. At this moment, for the next impact factor, when you read this email, there are 607 citations related to 439 publications (from 2019-2020).'
