Reviewer reports:

Reviewers continue to have major concerns and these concerns must be properly addressed and with utmost care, paying attention to each issue carefully. Earlier concerns raised have not been addressed and this is not acceptable.

Reviewer #5: 1. Line 80; 84-87; 146; 275. Sago and Enau is starch not flour like tapioca or rice flour. Because flour is natural product made by milling grains, usually wheat, to release the flour that sits inside, whereas starch made from pith extraction. Sago and Enau made from pith extraction, not milling the pith.

Reviewer #6: It is my belief that your manuscript is substantially improved after making the suggested edits. .

- Reviewer #7: 1. In line 331 (figure 2), please indicate which explanation for A, B, and C)
2. In figure 3, please make it clear. This figure is made for explain about the ingredients of pempek dough or how to make pempek dough.
3. To explain how to make pempek, it will be easier to understand if you also provide flowchat for explanation
4. Figure 5, pict number 6 and 7. Since those pictures are identical with different name, What the differences between "pempek filled by egg yolk" and "pempek kapal selam"? Is it same or not? If it different, it will be better if you use different picture
5. To make a good flowchart for explaining a process, it will better if you use instruction sentences in passive voice.
6. Please follow the guideline for writing the references

Reviewer #8: 1. I asked that the information on the study area was separated from the introductory section. This has not been done. Create a separate section 'Study Area' and organize that information there.

2. Under the methods, check spelling for 'narrativism'.

3. Mention and explanation of the sampling techniques adopted for recruiting the 18 study participants as well as the justification for the size have not been presented. I also saw 'the study was conducted with 30 workers and five sale outlets'. Is this different from the 18??? If so, what then is the actual sample size for the study? This is confusing and needs to be clarified. More so, I recommend the use of a table labeled 'Sample description' that shows the sample description and their corresponding sample sizes.

4. Extensive comparative analysis was used for analyzing the qualitative data? This is not clear. Read on the analytical procedures often used in qualitative studies, and describe the one that was used for your study and why it's appropriate from the literature.

5. The sub-theme 'literature review' needs to state specifically the topics or themes that have been reviewed and not presenting the discussion of the previous studies in a generic format. It's
