<b>CHAPTER 1</b>	<b>INTRODUCTION TO CAD/CAM/CAE SYSTEMS</b>	<b>1</b>
1.1	Overview	1
1.2	Definitions of CAD, CAM, and CAE	5
1.3	Integrating the Design and Manufacturing Processes through a Common Database—A Scenario	8
1.4	Using CAD/CAM/CAE Systems for Product Development—A Practical Example	11
	Questions and Problems	17
<b>CHAPTER 2</b>	<b>COMPONENTS OF CAD/CAM/CAE SYSTEMS</b>	<b>18</b>
2.1	Hardware Components	19
2.1.1	Vector-Refresh (Stroke-Refresh) Graphics Devices	20
2.1.2	Raster Graphics Devices	22
2.2	Hardware Configuration	26
2.3	Software Components	28
2.4	Windows-Based CAD Systems	33
	Questions and Problems	35
<b>CHAPTER 3</b>	<b>BASIC CONCEPTS OF GRAPHICS PROGRAMMING</b>	<b>36</b>
3.1	Graphics Libraries	36
3.2	Coordinate Systems	38
3.3	Window and Viewport	44

3.4	Output Primitives	47
3.4.1	Line	47
3.4.2	Polygon	49
3.4.3	Marker	49
3.4.4	Text	51
3.5	Graphics Input	52
3.6	Display List	53
3.7	Transformation Matrix	54
3.7.1	Translation	55
3.7.2	Rotation	56
3.7.3	Mapping	60
3.7.4	Other Transformation Matrices	64
3.8	Hidden-Line and Hidden-Surface Removal	65
3.8.1	Back-Face Removal Algorithm	66
3.8.2	Depth-Sorting, or Painter's Algorithm	68
3.8.3	Hidden-Line Removal Algorithm	68
3.8.4	z-Buffer Method	70
3.9	Rendering	71
3.9.1	Shading	72
3.9.2	Ray Tracing	76
3.10	Graphical User Interface	77
3.11	X Window System	79
	Questions and Problems	80

## **CHAPTER 4 COMPUTER-AIDED DRAFTING SYSTEMS 83**

4.1	Drawing Setup	83
4.1.1	Units	84
4.1.2	The Size of Drawing (Limits)	84
4.1.3	Layer	86
4.1.4	Grid and Snap	87
4.2	Basic Drawing Functions	88
4.2.1	Straight Line	88
4.2.2	Circle and Circular Arc	89
4.2.3	Spline	89
4.2.4	Deleting	89
4.2.5	Filleting and Chamfering	89
4.2.6	Hatching	90
4.3	Annotation Functions	92
4.3.1	Dimensioning	92
4.3.2	Notes	92
4.4	Utility Functions	93
4.4.1	Copy	93
4.4.2	Window	93
4.4.3	Symbol	94

4.4.4	Macro or Parametric Programming	95
4.4.5	Measurement	95
4.4.6	Miscellaneous Functions	95
4.5	Compatibility of Drawing Files	96
	Questions and Problems	96

## **CHAPTER 5 GEOMETRIC MODELING SYSTEMS 101**

5.1	Wireframe Modeling Systems	102
5.2	Surface Modeling Systems	103
5.3	Solid Modeling Systems	104
5.3.1	Modeling Functions	105
5.3.2	Data Structure	114
5.3.3	Euler Operators	130
5.3.4	Boolean Operations	132
5.3.5	Calculation of Volumetric Properties	134
5.4	Nonmanifold Modeling Systems	139
5.5	Assembly Modeling Capabilities	141
5.5.1	Basic Functions of Assembly Modeling	142
5.5.2	Browsing an Assembly	143
5.5.3	Features of Concurrent Design	144
5.5.4	Use of Assembly Models	145
5.5.5	Simplification of Assemblies	145
5.6	Web-Based Modeling	146
	Questions and Problems	147

## **CHAPTER 6 REPRESENTATION AND MANIPULATION OF CURVES 149**

6.1	Types of Curve Equations	150
6.2	Conic Sections	151
6.2.1	Circle or Circular Arc	151
6.2.2	Ellipse or Elliptic Arc	152
6.2.3	Hyperbola	153
6.2.4	Parabola	154
6.3	Hermite Curves	155
6.4	Bezier Curve	157
6.4.1	Differentiation of a Bezier Curve Equation	160
6.4.2	Evaluation of a Bezier Curve	162
6.5	B-Spline Curve	162
6.5.1	Evaluation of a B-Spline Curve	171
6.5.2	Composition of B-Spline Curves	171
6.5.3	Differentiation of a B-Spline Curve	171
6.6	Nonuniform Rational B-Spline (NURBS) Curve	173
6.6.1	Evaluation of a NURBS Curve	178
6.6.2	Differentiation of a NURBS Curve	178

- 6.7 Interpolation Curves 180
  - 6.7.1 Interpolation Using a Hermite Curve 180
  - 6.7.2 Interpolation Using a B-Spline Curve 184
- 6.8 Intersection of Curves 185
  - Questions and Problems 187

**CHAPTER 7 REPRESENTATION AND MANIPULATION OF SURFACES 189**

- 7.1 Types of Surface Equations 189
- 7.2 Bilinear Surface 190
- 7.3 Coon's Patch 191
- 7.4 Bicubic Patch 193
- 7.5 Bezier Surface 196
  - 7.5.1 Evaluation of a Bezier Surface 198
  - 7.5.2 Differentiation of a Bezier Surface 199
- 7.6 B-Spline Surface 201
  - 7.6.1 Evaluation of a B-Spline Surface 202
  - 7.6.2 Differentiation of a B-Spline Surface 202
- 7.7 NURBS Surface 203
- 7.8 Interpolation Surface 208
- 7.9 Intersection of Surfaces 210
  - Questions and Problems 212

**CHAPTER 8 FINITE-ELEMENT MODELING AND ANALYSIS 214**

- 8.1 Introduction to Finite-Element Analysis 215
- 8.2 Formulation of the Finite-Element Method 218
- 8.3 Finite-Element Modeling 230
- 8.4 Automatic Mesh Generation 233
  - 8.4.1 Node Connection Approach 234
  - 8.4.2 Topology Decomposition Approach 237
  - 8.4.3 Geometry Decomposition Approaches 239
  - 8.4.4 Grid-Based Approach 240
  - 8.4.5 Mapped Element Approach 243
  - 8.4.6 Improvement of Mesh Quality 245
- 8.5 Case Study 247
  - Questions and Problems 255

**CHAPTER 9 OPTIMIZATION 257**

- 9.1 Optimization of the Optimization Problem 257
- 9.2 Treatment of Constraints 259
  - 9.2.1 Exterior Penalty Functions 260
  - 9.2.2 Interior Penalty Functions 262

9.3	Search Methods	264
9.4	Simulated Annealing	266
9.4.1	Combinatorial Optimization	267
9.4.2	Algorithm	268
9.4.3	Applications	271
9.5	Genetic Algorithms	275
9.5.1	Basic Principles	276
9.5.2	Application	280
9.6	Structural Optimization	282
9.6.1	Sizing Optimization	283
9.6.2	Shape Optimization	284
9.6.3	Topology Optimization	286
	Questions and Problems	289
<b>CHAPTER 10</b>	<b>CAD AND CAM INTEGRATION</b>	<b>291</b>
10.1	Overview of the Discrete Part Production Cycle	292
10.2	Process Planning	293
10.2.1	Manual Approach	294
10.2.2	Variant Approach	299
10.2.3	Generative Approach	300
10.3	Computer-Aided Process Planning Systems	300
10.3.1	CAM-I CAPP	301
10.3.2	MIPLAN and MultiCAPP	303
10.3.3	MetCAPP	303
10.3.4	ICEM-PART	304
10.4	Group Technology	304
10.4.1	Classification and Coding	305
10.4.2	Existing Coding Systems	306
10.5	Product Data Management (PDM) Systems	316
	Questions and Problems	317
<b>CHAPTER 11</b>	<b>NUMERICAL CONTROL</b>	<b>319</b>
11.1	Introduction	319
11.2	Hardware Configuration of an NC Machine Tool	320
11.3	Types of NC Systems	322
11.4	NC/CNC/DNC	322
11.5	Basic Concepts for Part Programming	325
11.5.1	Coordinate Systems	325
11.5.2	Syntax of a Part Program	327
11.6	Manual Part Programming	332
11.7	Computer-Assisted Part Programming	337
11.7.1	APT Language	338
11.7.2	Other Part Programming Languages	352

- 11.8 Part Programming from CAD Database 353
  - 11.8.1 Tool-Path Generation 356
  - 11.8.2 Tool-Path Simulation and Verification 361
  - 11.8.3 Case Study 363
- Questions and Problems 376

**CHAPTER 12 RAPID PROTOTYPING AND MANUFACTURING 378**

- 12.1 Overview 378
- 12.2 Specific RP&M Processes 379
  - 12.2.1 Stereo Lithography 382
  - 12.2.2 Solid Ground Curing 383
  - 12.2.3 Selective Laser Sintering 384
  - 12.2.4 3D Printing 386
  - 12.2.5 Laminated-Object Manufacturing 387
  - 12.2.6 Fused-Deposition Modeling 389
  - 12.2.7 Low-Cost RP&M Machines 390
- 12.3 Applications of RP&M 392
  - 12.3.1 Prototype for Design Evaluation 393
  - 12.3.2 Prototype for Function Verification 393
  - 12.3.3 Rapid Tooling Processes 394
  - 12.3.4 Special Application Examples 408
- 12.4 Stereo Lithography Process 411
  - 12.4.1 Geometry Input 411
  - 12.4.2 Part Orientation 415
  - 12.4.3 Support Structure 416
  - 12.4.4 Slice and Merge 417
  - 12.4.5 Preparation 421
  - 12.4.6 Part Building 421
  - 12.4.7 Part Completion and Draining 424
  - 12.4.8 Post-Processing 424
- 12.5 Software Technology for RP&M 425
  - Part Preparation Software Tasks 426
  - Questions and Problems 431

**CHAPTER 13 VIRTUAL ENGINEERING 432**

- 13.1 Definition of Virtual Engineering 433
- 13.2 Components of Virtual Engineering 433
  - 13.2.1 Virtual Design 434
  - 13.2.2 Digital Simulation 435
  - 13.2.3 Virtual Prototyping 436
  - 13.2.4 Virtual Factory 437

13.3	Application of Virtual Engineering	438
13.3.1	Design Tool	438
13.3.2	Manufacturability Assessment	439
13.3.3	Quality Estimation and Control	439
13.3.4	Process Validation and Optimization	439
13.3.5	Production and Product Planning	440
13.3.6	Customer Interface	440
13.3.7	Knowledge Database	440
13.3.8	Collaborative Engineering	441
13.4	Related Technologies	441
13.4.1	Integration of CAD and Simulation	441
13.4.2	LOD and Culling	442
13.5	Industry Application Cases of Virtual Engineering	443
13.6	Software Products	445
13.7	Hardware Products	450
13.8	Research Issues and Challenges of Virtual Engineering	453
	Questions and Problems	454
<b>CHAPTER 14</b>	<b>STANDARDS FOR COMMUNICATING BETWEEN SYSTEMS</b>	<b>456</b>
14.1	Exchange Methods of Product Definition Data	457
14.2	Initial Graphics Exchange Specification	458
14.3	Drawing Interchange Format	463
14.4	Standard for the Exchange of Product Data	464
	Questions and Problems	467
<b>APPENDIX A</b>	<b>Implementation of the Half-Edge Data Structure</b>	<b>468</b>
<b>APPENDIX B</b>	<b>Implementation of the Winged-Edge Data Structure</b>	<b>471</b>
<b>APPENDIX C</b>	<b>Euler Operators</b>	<b>474</b>
	C.1 Euler Operators Used in SNUMOD	474
	C.2 Application of Euler Operators	479
<b>APPENDIX D</b>	<b>Step-by-Step Algorithm for Implementing Boolean Operation</b>	<b>488</b>
<b>APPENDIX E</b>	<b>Data Structure and Topology Operators for Nonmanifold Modeling Systems</b>	<b>495</b>
	E.1 Data Structure	495
	E.2 Operators Used to Manipulate Topology	500
<b>APPENDIX F</b>	<b>The de Casteljau Algorithm</b>	<b>504</b>
<b>APPENDIX G</b>	<b>Evaluation of the B-Spline Curve by the Cox-de Boor Method</b>	<b>507</b>
<b>APPENDIX H</b>	<b>Composition of B-Spline Curves</b>	<b>512</b>

<b>APPENDIX I</b>	<b>Proof of the Formula for B-Spline Differentiation</b>	<b>515</b>
<b>APPENDIX J</b>	<b>Peng's Approach to Calculating the Intersection of NURBS Surfaces</b>	<b>519</b>
	J.1 Subdivision	519
	J.2 Tracing Intersection Segments	521
<b>APPENDIX K</b>	<b>Formulation of FEA System Equations from the Governing Differential Equation</b>	<b>523</b>
<b>APPENDIX L</b>	<b>Comparison of Windows-Based CAD Systems</b>	<b>529</b>
	<b>References</b>	<b>537</b>
	<b>Index</b>	<b>548</b>
