1 Mei 2019 11.46

**Dear erwin erwin**

your submitted manuscript entitled:

**Extraction of Retinal Blood Vessels Using Dynamic Threshold with Enhancement Image Filter and Operations Morphology in Retina Fundus**

Is received , you should revised revised paper, taking expert's comments into account. Please send us revised version of your paper within one week .

Dear Authors,

Thank you for submitting your paper in the Journal of Information Systems and Telecommunication (JIST). I read the abstract of paper but I couldn't understand this sentence: "In the medical world, diagnosing disease retina". Please check your manuscript again and correct some vague sentences in paper. After that upload .pdf and MS word of manuscripts as soon as possible.  
Best Regards

Sincerely

Editor in Chief

Regards  
Journal of Information Systems and Telecommunication (JIST)

Dear Dr. Erwin Unsri

After your last revised in the manuscript of 13971227178287, I understood that you edit just abstract in the profile of paper. So, based on that main text of the paper were edited and now they accessible in paper profile by 13971227178287. also, I check some mistake in manuscript such as "Buttworth Bandpass Filter" which the correct of that is "Butterworth Bandpass Filter". Finally, JIST will continue his review process based on 13971227178287 version of your paper and 13980215179104 version will be dropped.

If you have any comment please share to me.

Best Regards  
JIST Editor

**Dear erwin erwin**

The review of your submitted manuscript entitled: **Retinal Vessel Extraction Using Dynamic Threshold And Enhancement Image Filter From Retina Fundus** Is now complete and based on reviewers' comments, you are advised to resubmit the revised paper, taking reviewers' comments into account. Please note that, revised papers are re-reviewed and you are required to highlight the revised parts for easy inspections.

**Dear Authors**

Your paper reviewed by reviewers and they share their comments as below. Firstly, you should revise your manuscript based on reviewers' comments and highlight your modification in the paper. Secondly, based on reviewers comments for each comment you should explain modification in paper separately by their page numbers in tow columns: "reviewer comment" and "author modification".

Note that you should modify your manuscript based on reviewers comment quickly and upload the modified version of the paper as soon as possible.

Best Regards,

**Reviewer 01:**

The originality of the work is not high enough. The performance of the method should be compared with that of other existing methods in terms of F-Measure and computational cost. In the abstract, the main ideas, assumptions, limitations, pros, and cons of other available work, and the quantitative superiority of the proposed method should be mentioned. There are some grammatical errors and typos in the text. It is "Related Work" not is "Related Works". The reference of each figure coming from other publications should be written on its caption. The reference of each equation should be written right above it.

**Reviewer 02:**

- 1- The authors are suggested to ask some native speaker to revise that and the whole paper.
- 2- The contribution and the novelty of this work are not clear.
- 3- In the related work section, the shortcoming of each mentioned method must be explained separately.
- 4- The formula in the proposed method section must have a reference.
- 5- The proposed method should be applied in the other database such as STARE
- 6- The execution time of the proposed method must compare to the other methods.

Sincerely

Editor in Chief

Regards

The review of your submitted manuscript entitled: **Retinal Vessel Extraction Using Dynamic Threshold And Enhancement Image Filter From Retina Fundus** Is now complete and based on reviewers' comments, you are advised to resubmit the revised paper, taking reviewers' comments into account. Please note that, revised papers are re-reviewed and you are required to highlight the revised parts for easy inspections.

Dear Authors

Thank you for modification. As I wrote, you should add current MS word content(table)of your paper on the first of paper. Now, You design table in MS word separately and in pdf file you just highlight the body of the text. Please combine 2 files and upload it as 2 formats (MS word and Pdf). Finally, upload them as soon as possible.  
Best Regard,

Sincerely

Editor in Chief
