Renewable & Sustainable Energy Reviews

Comments from the editors and reviewers:

Reviewer #1: Do you really think that hydropower is expected to be, worldwide, the core power generation to solve the energy demand and environmental problems in the future? What about MENA region?

Personally, I think this paper gives little value to the reader. There have many descriptions that are not correct or not exact!!!

Reviewer #2: It is a good short review about the potential, unused capacity, and installed capacity of hydropower project in the world.

Dear Dr. Darmawi,

Thank you for your e-mail.

With regard to your query about the caption, it is also known as legend which describes about the given figure. Kindly find below the caption/legend you have provided for figure 1.

•

However, this is to inform you that figure 2 is supplied but it is not cited in the text. Kindly confirm if we can ignore figure 2. File received for figure 2 is attached for your quick reference.

I look forward for your quick response regarding figure 2. If it has to be incorporated in your proof, please provide us the citation and the caption/legend at your earliest convenience, so that we may proceed further with the publication of your article.

Please do not hesitate to contact me if I may be of further assistance.

Thank you,

Kind regards,
