Reviewer A:
This article is improved and good to be received in the journal Recommendation: Accept Submission

Reviewer B:
I have some comments:
Make the tables open
Mention in the methods the statistical methodology and abbreviations used as PR probability of event etc.

In discussion the second paragraph and in conclusion you can rephrase it by using for e.g. dietary zinc deficiency (which you attributed to both intake and absorption) not just intake and supported by results in table 4. that show some who take sufficient zinc have low serum levels(probably the absorption group) so you could explain it.
In the third paragraph of discussion you have to clarify Big brain in its context.

For references write all authors if they are six or less
If more than six mention the first three and use et al.

Modify the acknowledgment title to Funding acknowledgment.

Recommendation: Revisions Required
