**MANUSCRIPT DETAILS**

**TITLE: ASSESSMENT OF BLOCK CHAIN BASE ACCOUNTING TECHNOLOGY AND ACCOUNTING REPORT EFFICIENCY AMONG SMES OPERATORS IN JORDAN**

**ABSTRACT:**

this study made an assessment of block chain base accounting technology and accounting report efficiency among SMEs operators in Jordan

This study used a survey as its research method. In order to get an accurate representation of the population, employed Krecie and Morgan sampling formula to pick 103 participants. A questionnaire served as the data gathering tool. Experts in testing and measuring confirmed the reliability of the equipment. Cronbach's alpha was employed to determine the instrument's dependability, and the results showed a range of 0.73 to 0.85. Percentage and PPMC analyses were performed on the collected data from the surveys.

The results demonstrate and indicate that the accounting reporting effectiveness of Jordanian SME owners and managers is significantly correlated with the use of block chain accounting technology. The research suggested that SME owners and operators take advantage of hands-on training courses offered by specialized professional organisations like the Jordanian Certified Public Accountants Association to better understand how to use BT and lessen the risks associated with it. The administrations of BT firms must activate the function of control activities based on the COSO Committee framework to ensure that BT risks are managed in a timely and suitable manner and to enhance the quality of information in financial reports.

This study is one of the first attempts to examine the how block chain technology affects accounting profession, financial report transparency and financial report credibility among SMES operators

I appreciate your help in accomplishing our goal of having an expedited reviewing process. Please do not hesitate to

contact me if I can be of any assistance.

Sincerely,
