Preferred citation for this article:
 dan Rozirwan M.H., 2017. Optimization of cultivated seaweed land *Gracilaria sp* using *Vertikultur* system, International Journal of Marine Science, 7(43): 411-421 doi: [10.5376/ijms.2017.07.0043](https://doi.org/10.5376/ijms.2017.07.0043)

Abstract The production of *Gracilaria sp* is still not optimal and there are some opportunities left for production improvement by developing methods that use depth levels as planting media. *Vertikultur* method using the nets is more effective and has higher production levels. This research aims to solve problems in cultivating *Gracilaria sp* seaweed by doing field optimization. Seaweeds were planted as many as 40 points for each 10 levels depth (BRL); 0, 70, 140, 210, 280, 350, 420, 560, and 630 cm from the surface.

Dear Dr. Muhammad Hendri,

Sorry to reply to you late. There are still some mistakes that I have pointed out but you failed to follow. Please check the word document again and send me your revised paper as soon as possible.

Regards,

Sel, 7 Nov 2017, 03.23

Dear IJMS Editor

I apologize for sending my paper repairs up to three (3) times. Because there is an error in the reference writing. The most correct is the last sent.
thanks.

Regards

M.Hendri
