 - Because tables and figures supplement the text, all tables and figures should be CITED in the text. Authors MUST EXPLAIN what the reader should look for when using the table or figure. Focus only on the important point the reader should draw from them, and leave the details for the reader to examine on her own.
 - Tables are to be presented with single horizontal line under: the table caption, the column headings and at the end of the table. All tables are produced by creating tables in MS Word. Captured tables (as image) are NOT allowed.
 - All figures MUST be in high quality images
