Fitri Maya Puspita:

We have reached a decision regarding your submission to TELKOMNIKA Telecommunication, Computing, Electronics and Control, "Cobb-Douglass Utility Function in Optimizing the Internet Pricing Scheme Model".

Our decision is to: ACCEPT with minor revisions

Simple Check-list for preparing your final papers:

-
1. Title: Title should be as brief as clarity permits (max. 10 words), without acronym or abbreviation. A title is fewest possible words BUT accurately describe the finding or contribution.
 2. Abstract: The Abstract (MAX 200 WORDS) should be informative and completely self-explanatory (citations are prohibited in abstract), provide a clear statement of the problem, the proposed approach or solution, and point out major findings and conclusions.
 3. Introduction: The author is also suggested to describe the real problem existing (supported some journal articles) in order to satisfy the criteria of this scientific journal which has to introduce any novelties, improvement etc from the research work prior to the problem solving done or proposed by the author as a significant contribution.
 4. Research Method: The presentation of the research method should be clear and complete in every detail facilitating reproducibility by other scientists.
 5. Results and Discussion: The presentation of results should be simple and straightforward in style. This section reports the most important findings, including results of statistical analyses as appropriate and comparisons to other research results. This section should be supported suitable references.

6. Conclusion: Your conclusion should make your readers glad they read your paper.

Summarize sentences the primary outcomes of the study in a paragraph.

Citations are prohibited in conclusion section

7. References: We will usually expect a minimum of 10 to 25 references primarily to journal papers, depending on the length of the paper. Citations of textbooks should be used very rarely and citations to web pages should be avoided.

Each source you cite in the paper must appear in your reference list;

likewise, each entry in the reference list must be cited in your text.

References are written in Numbering style. Each citation should be written in the order of appearance in the text.

8. Figures and Tables: Select only the most important of your tables.

Results given in figures should not be repeated in tables. All figure

legends and tables should be included in the manuscript.

9. Paragraph

A paragraph is a sentence or group of sentences that support one main idea.

Many authors have presented paragraphs in very long terms. Author should use simple sentences which are grammatically correct, but too many can make your writing less interesting.

Every paragraph in a paper should be:

- Unified: All of the sentences in a single paragraph should be related to a single controlling idea (often expressed in the topic sentence of the paragraph).

- Clear: The sentences should all refer to the central idea of the paper.

- Coherent: The sentences should be arranged in a logical manner and should follow a definite plan for development.

- Well-developed: Every idea discussed in the paragraph should be adequately explained and supported through evidence and details that work together to explain the paragraph's controlling idea.

10. Others

Do a final proofread to make sure your paper is perfect.

Please strictly adhere to the guidelines provided with the MS Word template
