Please do revise your manuscript as per comments/suggestions inside the article files

Further comments are indicated in **Red color** inside the file. See them and revise accordingly. After corrections, kindly indicate at the same place that the corrections are done by writing [Done] in square brackets.

Reviewer B comments:

- The manuscript must be arranged as per [attached hsr template](#). Especially abstract should be written in 5 subheadings of Purpose, Methodology, Main findings, Implications, Novelty.
- The title should tell the true story of the research article.
- First two lines of the abstract should tell about what has been done in this research. Don't tell the background of research in the abstract. All background information should go in the introduction section.
- Enter six (6) keywords that truly represent the essence of research work. Three keywords should be in article title also.
- All citations must be hyperlinked with references. For help see this video <https://www.youtube.com/watch?v=3OIOXhkd8&t=2s>

Note on Plagiarism and Similarity:

GIAP Journals follows ZERO Plagiarism policy. We check all articles by iThenticate (Turnitin software). You are expected to see [attached similarity report](#) as well and take the following actions:

- Wherever you see the similarity, full paragraph or 2 to 3 lines full copy-pasted, you need to rewrite in your words. It will reduce similarity.
- If you are taking any text, information, idea, images, data, table, etc. from some source then you should do paraphrasing and you have to give citations to that source. Otherwise, the article will be labelled as Plagiarized and Rejected and no query will be entertained.
- If your Similarity index is above 10%. You need to send a new Turnitin report from your side showing similarity of less than 10%.
