Dear Dr. Indra Yustian,

It is a pleasure to contact you to request your kind collaboration as an expert reviewer for *Marine and Fishery Sciences* (MAFIS), formerly Revista de Investigación y Desarrollo Pesquero of INIDEP (Argentina). We have received the manuscript ref. MAFIS-437 entitled: "Movement of the bull shark (*Carcharhinus leucas*) in the upper Mississippi River Basin, North America", whose introduction states that:

"Bull shark fossil remains are known from the Miocene of North and South America (Cameron and Boreske 1972; Apolín et al. 2007), though fossil teeth similar to the "bull [shark] group" of species may extend the North American record of similar animals to the Eocene (Cappetta 2012). Similarly, both the Mississippi and Amazon Rivers have geological histories spanning 10 million years or more. Given these observations, it is likely that far upstream exploration of river systems by these sharks is a behavior with a long history as well. However likely this may be, it is not presently clear if the history of upstream exploration in the Mississippi River Basin is well-evidenced. "

This *Editorial Committee* would appreciate receiving your response to review (affirmative or negative) as soon as possible by entering to this link *MAFIS* with:

user: yustian
provisional password: yustian1234 (system will ask you to change this password)

In case of not being able to carry out the review, we would appreciate you suggesting some expert colleague in the field.

The *Editorial Committee* thanks and encourages research communities around the world to share their new ideas using this magazine as a platform. Marine and Fishery Sciences is fully committed to the Open Access initiative and provides free access to all articles as soon as they are published.

For any inconvenience, do not hesitate to contact me to this email address.
Sincerely,

--

Dear **Dr. Eddie Oscar Aristizabal Abud**,

sorry for the late reply of this email, I was in the field (Sembilang NP) last week and couldn't have any internet connection.

Yes, I would like to review the manuscript. Please give me more time to do it.

Warm regards,
indra

[Review Guidelines](#)

Reviewer Form IV

Dear Reviewer:

MAFIS adheres to the "double blind" type of review, in which there is no knowledge between authors and reviewers.

- In your opinion the paper should be: Rejected *

YES

NO

Accepted without modifications

YES

NO

Accepted with minor modifications

- YES
- NO

Accepted after major modifications

- YES
- NO

- Is the subject adequately treated? *

- YES
- NO

- Does the author show an adequate knowledge of the subject and of the relevant bibliography?

*

- Suitable
- Scarce
- Poor

- Does the paper include enough original information? *

- YES
- NO

- Does information from other sources adequately cited and included in the literature list?

*

- YES
- NO

- Is the paper too long? *

YES

NO

- Is writing adequate? Verify that development of ideas stated is clear and logical. For example: Are ideas correctly organized and subordinated? Are there apparent meaning discrepancies or contradictory information?

*

It is look correctly organizes and subordinated, and no contradictory information found.

- Are the title and abstract adequate? Verify that references to the species or resource, to the geographic location and to the time period considered are included.

*

yes. Ebert et al. 2013 (Sharks of the world) should be add in reference and content.

- Are illustrations in good agreement with reported results? *

YES

NO

- Should all illustrations be included? *

YES

NO

- Do epigraphs of tables and figures adequately describe their content? Do they include the respective geographic and temporal references?

*

- YES
 NO

- Are all mathematical equations correctly written?

- YES
 NO

- Are the interpretations and conclusions justified, and founded on the results reported?

*

yes.

- Does the paper require additional data and research? *

- YES
 NO

- It would be advisable to submit the paper to another referee for additional review, so I suggest the name of:

Please include here everything you consider necessary to justify your evaluation and help reaching an editorial decision. Thank you

1. Ebert et al. 2013 (Sharks of the world) should be add in reference and content.
2. please add information about the presence of bull shark also in Sumatra [Iqbal et al 2019: First photographic inland records of bull shark *Carcharhinus leucas* (Carcharhiniformes: Carcharhinidae) in Sumatran waters, Indonesia] and Borneo [Iqbal et al 2019: First inland record of bull shark *Carcharhinus leucas* (Carcharhiniformes: Carcharhinidae) in Indonesian Borneo]

Dear Dr. Indra Yustian,

We have successfully received your revision of the manuscript ref. MAFIS-437 entitled "Movement of the bull shark (*Carcharhinus leucas*) in the upper Mississippi River Basin, North America". We greatly appreciate the commitment of your time and expertise. Peer review is a crucial step in the scientific process that takes time and we appreciate your willingness to be a reviewer. On behalf of MAFIS' [Editorial Committee](#), we appreciate your participation in the review and look forward to contacting you in the future. Feel free to contact us if you have any suggestions on how to improve our peer review process.

Once the evaluation process is reached, we will inform you about the result of the evaluation regarding this manuscript.

We would be honored if you considered [MAFIS](#) to publish your next work.

Thanks for supporting this journal

Sincerely yours,

Eddie Aristizabal

You have a new notification from Marine and Fishery Sciences (MAFIS):

Dear Dr. Indra Yustian,

Thanks for reviewing the manuscript ref. MAFIS-437 entitled "Movement of the bull shark (*Carcharhinus leucas*) in the upper Mississippi River Basin, North America". With your help, I have reached the decision to **accept** this manuscript, which will be published in Marine and Fishery Sciences 34 (2) 2021 next July.

Thank you for your contribution and time in reviewing this article, which not only assisted me in reaching my decision, but also enables the author(s) to disseminate their work at the highest possible quality.

I am grateful to you for your assistance as a reviewer for Marine and Fishery Sciences (MAFIS).

Dr. Eddie O. Aristizabal Abud

Editor-in-Chief

Marine and Fishery Sciences (MAFIS)

Dear Dr. Indra Yustian,

Marine and Fishery Sciences (MAFIS) relies on the efforts and integrity of our reviewers to examine each submitted manuscript and provide an opinion on its suitability for publication. With the attached certificate we want to express our gratitude for your activity in 2021, which is highly appreciated by the Editorial Committee of the journal.

We hope you can continue your collaboration with us and we thank you once again.

Sincerely,

Dr. Eddie O. Aristizabal Abud

Dear Dr. Eddie Aristizabal,

Glad to receive your email and the certificate. Thank you very much...! Hope your MAFIS will gain its goal(s) and mission(s).

Success for you and MAFIS in the future....!

Wa from Palembang (Indonesia)

Indra Yustian
