### ABSTRACT

**Background :** In adolescence often incompatibility between psychological and social development. If this incompatibility is not be good overcome can be avoid in negative behaviors. One of the negative behavior is free sex. According to survey of BKKBN in 2008 showed about 43% of adolescents in Indonesia ever done free sex. This sexual behavior **73** affected by inherent factors in himself. These factors were grouped into *hard skill* and *soft skill* factors. **75** aim of this research was to know the influence of *hard skill* and *soft skill* factors with sexual behavior in adolescents of Seberang Ilir area of Palembang city.

**Method :** This study is a quantitative research with **26** sectional approach. The method used by clarifying questionnaire. Data collected and processed using SPSS program and performed univariate analysis and bivariate analysis. Study sample was adolescent living in 12 districts at Seberang Ilir area of Palembang city with 95 respondents sample.

**Results :** The research indicated that there was influence between knowledge ( $P_{sig} = 0,000$ ), emotional intelligence ( $P_{sig} = 0,018$ ), moral intelligence ( $P_{sig} = 0,005$ ), *hard skill* ( $P_{sig} = 0,000$ ), and *soft skill* ( $P_{sig} = 0,003$ ) with sexual behavior in adolescents.

**Conclusion :** The factors of *hard skills* and *soft skills* have influence with sexual behavior in adolescents. Need an increase in *hard skill* (knowledge), and *soft skills* (emotional intelligence and moral intelligence) so that the adolescent can avoid sexual behavior.

**Keywords :** Sexual behavior, knowledge, emotional intelligence, moral intelligence, *hard skills* and *soft skills*.
