Abstract:

Food security in Indonesia is one of the health problems due to the lack of knowledge and understanding. This study aims to analyze personal hygiene and sanitation facilities in the implementation of food stalls serving on campus. The method used is observation and depth interview using checklist sheet and photo voice relate to the person. The results of the study are in accordance with the Minister Regulation of Republic of Indonesia or Permenkes RI No. 907/Menkes/SK/VII/2008. The implementation of food stalls serving on campus observed not appropriate with the standard and have of lack of practice washing hands with soap when they serving food. All information with potential hazards. All canteen, do not have garbage's and waste disposal and facility clean approximately 90%. To sum up, it needed effort to do counseling, supervision and guidance and medical checks up for employee to improve the knowledge, health behavior and health standardized.
