Dear Dr. Hafy

We are pleased to inform that your article entitled "**Analysis of the interferon lambda 3 and 4 gene single nucleotide polymorphisms and vaccine response against COVID-19**" has been published in "**Advances in Human Biology**". With this mail we are sending you the final PDF of the article for your personal use.

The internet today provides more opportunities than before to improve the visibility of your research work. There have been some studies to show direct correlation of article downloads to citations received. The journal's website and its bibliographic linking does help you to get readers, however, additional linking by you would help you to get even higher citations and research impact. You can use few (or all) of the online tools for this purpose.

1. If your institution has an open archive repository, you can put the PDF of your article in the archive with a link to the article on the journal's website <https://www.aihbonline.com/text.asp?2023/13/1/1135/356793>. Check <http://www.eprints.org/openaccess/self-faq#self-archiving> to learn more about archiving.
2. Deposit the article in a subject based OAI-PMH compliant repository. You can find subject wise list of repositories from <http://www.opendoar.org/find.php> and <http://opcit.eprints.org/explorearchives.shtml#disciplinary>.
