Referee Summary Report

Evaluation Item	Ref 1	Ref 2	Average (%) 2 Referees
1.Relevance to I-RIA2021	8	9	85.0%
2.Originality, Novelty	7	7	70.0%
3.Technical Quality & Evidence	7	8	75.0%
4.Presentation Style	7	6	65.0%
5.Contribution to Theory or Practice	7	6	65.0%
6.Overall Rating	7	7	70.0%
7.Overall Comments	View Comment 1	View Comment 2	2 Comments

Referees' Comments

Comment Referee #1
The idea of the research is interesting and relevant. Authors can further improve the article by proving more discussion to highlight the impact of the proposed idea to wider context of users.

Comment Referee #2
Abstract what is the methodology used in the study? Is it experimental, simulation or prototyping approach? Introduction – Good. LR – should discuss appropriate theories that can be used to solve the problem such as GPS, RFID etc. Also critical analysis on the related or similar works Result, lack of discussion on how the proposed design was evaluated.
